Integrating health and wellness into schools gives students the opportunity for an academic advantage – what AFHK calls The Learning Connection.

- Physical activity has a positive impact on academic achievement. It leads to more focused classroom behavior and improved test scores.
- Participation in breakfast programs are associated with increased grades specifically math and arithmetic scores.
- There is a positive association between healthy dietary consumption and mental processes including cognition.
Game On supports America’s schools, their staff, students, and families to incorporate healthy food choices and physical activity into their daily lives and school environment, with the ultimate goal of helping your school become health-promoting.
